

## **Total Process Signs San Diego Based National Asset Direct**

**(Dallas, TX) May 7, 2008** – National Asset Direct (NAD), a pioneer in stressed asset portfolio management, signed on with Total Process as a new client on May 5, 2008. NAD recognizes the competitive advantages of outsourcing their IT to Total Process in order to remain focused solely on their core competencies of managing the unique risks associated with buying, servicing, and monetizing distressed mortgage loans.

NAD is owned and controlled by a seasoned, well-capitalized private investment firm and is able to provide a variety of liquidity and structured performance solutions to owners of whole-loan and securitized loans.

Total Process will provide and securely manage NAD's entire IT infrastructure – from staff to network to hardware, such as routers, switches and servers, for one predictable monthly fee. "Our service helps eliminate the risks, unknowns, headaches and high capital expenses out of their client's IT operations and then we manage it for them." says Jody Scott, CEO and Founder.

Total Process' proven approach to IT management ensures that their clients' IT cost center is always predictable and consistent, while providing access to the latest technology at a lower cost than what is paid for an in-house solution. Additionally, leveraging economies of scale to distribute the costs of network and systems engineers, help desk staff, data centers and managers across many clients, enables them provide technical support and around-the-clock monitoring at a fraction of the cost of an in-house solution.

"Our clients will spend less on expensive IT talent and training while keeping pace with their growth objectives," says Scott, "And by having Total Process focus on managing their IT systems, they can focus on core business operations and profitability."

X X X X

Total Process is a dynamic, innovative IT management company that offers affordable, simple, well-engineered solutions to businesses. As firm believers in the maxim, "a jack of all trades is a master of none," we focus exclusively on our core competency of efficiently managing our clients' IT operations so they can focus on their core competencies.
